

CLINIC INTRODUCTION

WELCOME TO TORA CLINIC

Planned, digital and personal dentistry in Istanbul.

ABOUT US

DENTISTRY, PLANNED TOGETHER

TORA was founded by three dentists who believe that good treatment starts with a shared plan, not separate procedures. Our prosthetic, restorative, endodontic and surgical doctors review every case together from the very beginning, so each decision is made with the complete result in mind.

We look after patients from Türkiye and from around the world, in a calm, modern clinic in Istanbul.

AT A GLANCE

WHAT MAKES TORA DIFFERENT

3
Founding dentists working on one treatment plan

4
Patient languages: English, Turkish, Arabic, French

6
Days a week, Monday to Saturday

9
Treatment areas, from implants to children's dentistry

- Licensed by the Turkish Ministry of Health for international health tourism
- Digital diagnosis and planning before treatment begins
- Strict, recorded sterilisation for every patient

REPUBLIC OF TÜRKIYE · MINISTRY OF HEALTH

AUTHORISED FOR INTERNATIONAL PATIENTS

T.O.R.A. Oral and Dental Health Polyclinic holds the **International Health Tourism Authorisation Certificate** issued by the Turkish Ministry of Health. This means our clinic is officially approved and inspected to treat patients travelling from abroad.

MINISTRY CERTIFICATE

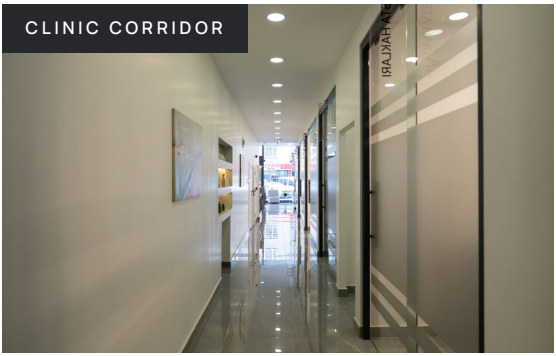

DOCTORS' CERTIFICATES

CALM, CLEAN & MODERN

Bright treatment rooms, a quiet lounge and a team who take time to explain. Our clinic is on the European side of Istanbul, close to Istanbul Airport.

INFECTION CONTROL

HYGIENE IS OUR STANDARD

Every instrument goes through the same controlled, recorded cycle before it reaches the next patient.

AUTOCLAVE

STERILE PACKING

01

Pre-cleaning

Used instruments are separated and placed in disinfectant.

02

Washing & drying

Ultrasonic cleaning and rinsing.

03

Packing & autoclave

Date-labelled pouches, sterilised with high-pressure steam.

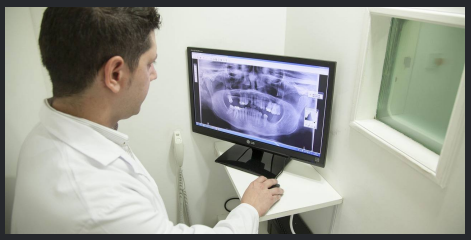

04

Opened in front of you

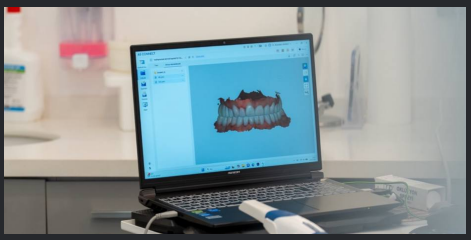

Sterile sets are stored closed and opened at your appointment.

DIGITAL DENTISTRY

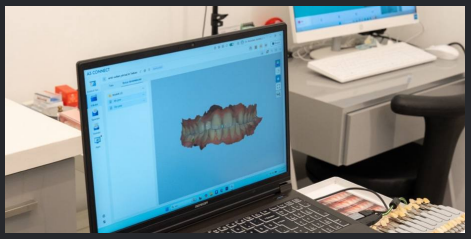

SEE THE PLAN
BEFORE TREATMENT

3D CBCT imaging
A 3D view of the jaw and bone for implant planning.

Intraoral scanning
A precise digital impression in minutes, no impression paste.

Digital planning
Treatment and smile design planned on a 3D model.

In-house production
3D printing and zirconia sintering inside the clinic.

FOUNDING PARTNERS

THREE DOCTORS. ONE PLAN.

Dr. Abdullah Tarakçı

WITH YOU FROM ARRIVAL TO AFTERCARE

Our coordinators, assistants and front-desk team look after your appointments, your questions and your follow-up.

UNDER ONE ROOF

COMPLETE DENTAL CARE

From a single filling to full-arch rehabilitation, every treatment is planned and carried out by the same team.

IMPLANTS & SURGERY

- Single & multiple implants
- All-on-4 / All-on-6 full arch
- Zygomatic implants
- Wisdom & impacted teeth
- Bone surgery

AESTHETIC & PROSTHETIC

- Smile design · Hollywood smile
- Veneers · E-max · zirconium
- Composite bonding
- Teeth whitening
- Crowns, bridges & dentures

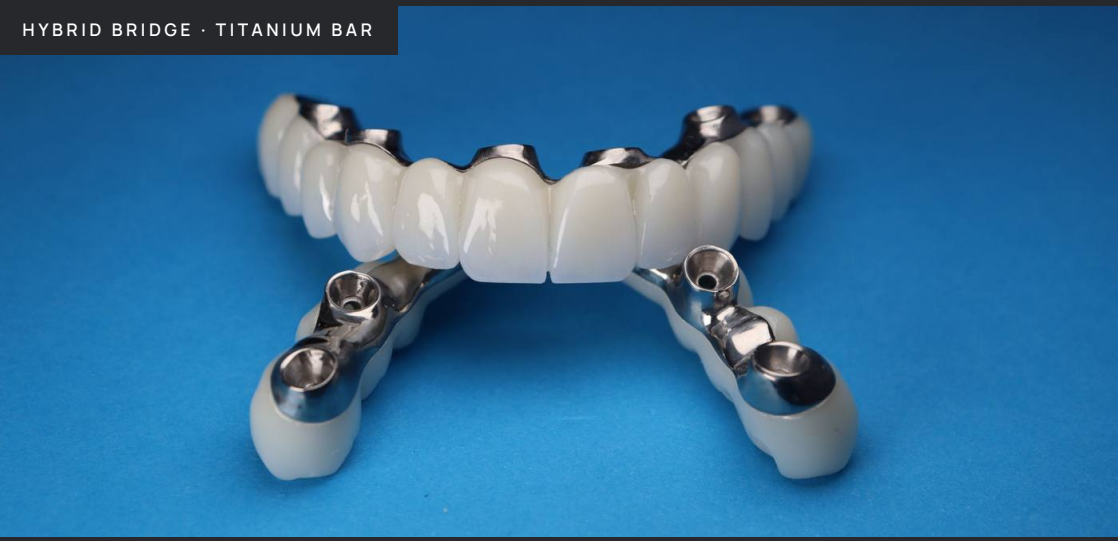

ORTHODONTICS & CHILDREN

- Clear aligners
- Fixed braces
- Retention & follow-up
- Children's dentistry

GENERAL & ENDODONTICS

- Check-ups & prevention
- Fillings & restorations
- Root canal treatment
- Gum treatment
- Emergency care

HYBRID BRIDGE · TITANIUM BAR

IMPLANT & FULL-ARCH SOLUTIONS

REBUILDING FUNCTION.
RESTORING CONFIDENCE.

From one missing tooth to a complete fixed arch on four or six implants. Bone, gums, bite and the final teeth are planned together with 3D imaging before surgery.

- Single & multiple implants
- All-on-4 / All-on-6 fixed teeth
- Zygomatic implants for selected cases

SMILE DESIGN

NOT A TEMPLATE.
YOUR SMILE.

We look at your face, lips, bite and natural teeth before choosing shape, shade and material. You see the digital design before treatment starts.

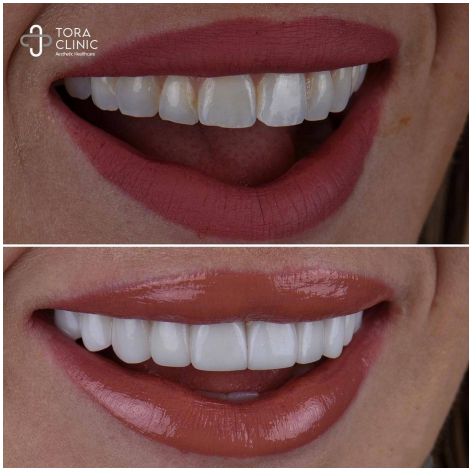

- **Porcelain veneers**
  Thin ceramic shells that refine shape and colour
- **E-max & zirconium crowns**
  Strong, natural-looking ceramic crowns
- **Composite bonding**
  Minimally invasive reshaping
